COMPARATIVE STUDY

MS Office vs Google Workshop

Feature Comparison of Word, Excel, PowerPoint and Google Docs, Sheets, Slides

Objective : To compare Microsoft Office and Google Workspace in terms of formatting, table creation, collaboration, file formats, offline availability, and automation support.

Features	MS Office	Google Office Suite
Text Formatting	BEST — MS Office: Extensive formatting, styles, themes and layout controls in Word.	Strong formatting tools; some advanced desktop features differ.
Table Creation	BEST — MS Office: Extensive table styling, layout and document formatting controls in Word.	Easy table insertion and editing; useful for collaborative documents.
Real Time Collabration	Supports co-authoring through Microsoft 365 and OneDrive.	BEST — Google Workspace: Simple browser-based live editing and sharing.
Saving/exporting formats	BEST — MS Office: Broad support for DOCX, XLSX, PPTX, PDF and other formats.	Supports Google-native formats and exports such as DOCX, XLSX, PPTX and PDF
Offline Availablity	BEST — MS Office: Installed desktop apps can work locally without a continuous internet connection, subject to licence and setup.	Offline editing is available after configuring supported browsers and files.
Macro/automation support	BEST — MS Office: VBA macros in supported desktop applications; automation options vary by app and platform.	Google Apps Script supports automation; it uses a different programming environment.
